Subject: URGENT: WV Spill -Actual Samples Expected

We will be receiving a request for SVOC and VOC (petroleum product - full VOC list with focus on BTEX) - expecting 3 samples + QC to arrive Wednesday. Preliminary results ASAP with final report 21 days. I expressed that we would run as SVOC 8270 and VOC 8260. SVOC will also calibrate as normal but add MCHM and PPH standard and any non-routine analyte would need to be reported as TICs.
